Dear Ms. Henney:

I am opposed to the practice of routinely feeding antibiotics to livestock, either for the purpose of rapid growth or to enable the farmer to raise greater numbers of animals per square foot of space.

Please know that the public expects the Food & Drug Administration to address this

99P-0485

C3066

concern immediately.
The effectiveness of
antibiotics in curing
human diseases is
at stake.

Sincerely yours,
Ann L. Hovan
(Mrs. Joseph)
