Dear Dr. Henney,

My concern is the effectiveness of antibiotics in curing human disease.

Obviously the greater amounts of human designed antibiotics are fed to cattle, sheep, & chickens in US factory farms JUST to fatten them quickly than are given for sickness. The EU has banned such usage; the WHO is calling for termination.

The US must inform consumers of this "dosed" food, regulate & phase it out.

Please inform me of your action on this VITAL issue. Respectfully, Jan Montgomery
