Michael A Friedman - Commissioner

I'm writing on behave of others like me, that you stop requiring cruel + obsolete animal tests for pharmaceuticals + instead allow companies to substitute in vitro tests for the safety of both humans + animals. They have feelings + they hurt like you + me. The animals have rights too, but they can't say no. How come the death row have rights, look what they have done to people. God made these animals I hope you think about it.
