Dear Mr. Friedman,

5412 '01 MAR 19 P3:54

I am writing this letter to call attention to Procter and Gamble Co's inhumane animal testing. I am outraged that these obsolete methods such as locking rabbits in restraining devices so that they are unable to move while chemicals burn into their eyes and shaved skin. This unnecessary cruelty could easily be substituted with in vitro tests for the safety of both humans and animals.

Please do not let this go on.

Thankyou for your time,

Whitney
