Docket # 00P-1211/CP1
5630 Fishers Ln Room 1061 (HFA-305)
Rockville MD 20852

Dear Ms. Henney:

There is currently no comprehensive government regulation of genetically-engineered foods, yet we've been eating them since 1996. Risks of use of these foods include loss of biodiversity as fewer varieties of crops are used, genetic infiltration of traditional varieties as pollen drifts, increased allergies and other potential health problems as an unaware public ingests these foods, greater reliance on chemicals as natural resistance to pests is reduced, control of the world's seeds by a few corporations as they acquire patents.

Please require all genetically engineered foods presently on the market to be labeled, allowing consumers to know what's in their

(over)

00P-1211 C 11040

foods. Please also require long-term safety testing of genetically-engineered new foods before they are allowed on the market.

Sincerely,

Stacey Harris
