Commissioner, Food & Drug Admin,

We are appalled that all Genetically engineered seed and food ingested by us U.S. citizens is not labeled as such.

They cannot be presumed to be safe. I want a choice

There have been no long Term studies as to safety to humans.

How dare you.

No European citizen would stand for this nor have they, yet we in the country of freedom have no say so -- again guinea pigs ??

I want to know when the food is real food or artificial.

Sincerely,

Jane & Paul Rendelson

Citizens
