March 12, 2001

Dear FDA Commissioner,

5305 '01 MAR 16 P3:32

I concur with these statements and am appalled that in a country that expouses "freedom", citizens are not informed on food labels about GE foods.

Since we eat foods from all over the globe, standards for food safety must address safety testing.

I support a moratorium on GE foods until long term environmental testing can be completed.

DEAR FDA,

I am writing to express my opposition to the FDA's new proposed rule and guidance on genetically engineered (GE) foods. The agency's voluntary labeling and notification proposals are totally inadequate to protect human health, the environment, and my right to know. I fully support the following:

- All GE foods and food ingredients should be labeled so I am informed and have a choice.
- GE foods should not be assumed to be safe and should be subject to mandatory pre-market safety testing.
- There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

Na
