I write to speak on Docket #00D-1396 and 00D-1598 on GE Foods. We need labels on so people can make a choice. We need premarket testing. People can be sensitive, allergic to these altered products. Look at the problems now with antibiotic, or chemicals like DDT, which now has resistant problems now with "Super Bugs or weeds." This can happen with these products. Some states may be putting restrictions on GE grain because of buyers not wanting. You produce what the market wants. All this has been or is for power and profit. People need to know and have a choice and have safe, tested food.
