Dear Commissioner Henney:

Please support the Center for Food Safety's legal petition demanding mandatory pre-market safety testing, environmental review and labeling of all genetically engineered foods. I am concerned that GE corn and other foods, laced with pesticides and other foreign materials, will not only get into human foods but in the whole food chain as well. This dangerous practice of un-monitored GE food in our stores must stop.

Sincerely, Erica Fielder

OOP-1211

P.S. Please write to let me know what you intend to do.

C 110312
