Dear Commissioner Henney,

I am writing to ask you to see that no new genetically engineered foods or products with genetically engineered ingredients be released until the F.D.A. requires long-term safety testing of all genetically engineered food. Also, please see that genetically engineered foods presently on the market are labelled, giving the consumer the right to know.

Thank you for your prompt attention to this matter.

Sincerely,

Ruth F. Hooke
(address above)

I would appreciate knowing how you plan to act on this matter.
