To Whom it May Concern:

I recently read an article about hens, and the inhumane treatment they are receiving. The egg industry exploits the hens natural process of molting, to gain more profit. I urge that you try and put a stop to this. Millions of hens are forced to molt and starve at the same time just so they can produce more eggs. This is wrong, and the hens should be treated just like any other animal, such as a cat and dog. They must be fed and taken proper care of. Thank you for your time.
