Cor 215

Dear FDA - USDA's animal plant health Inspection Service,

Many egg industries are treating the hens very unfairly They are starving them on periods between 2 to 14 days. I feel this is a very unjust way to treat them. First of all you wouldn't want to be put in bad conditions and then be starved. Secondly if we didn't have hens we wouldn't have eggs to eat. So if you can please try to put an end to the abuse towards hens I would appreciate it.

Sincerely
Kristin Scanlon
