To whom it may concern

99 MAR 24 P2:22

Reference: Docket #98N-1038.

Happy first day of spring, a time of renewal, celebration and planting — preferably ORGANIC!

I am writing to request that the FDA stop plans to remove all labeling requirements for irradiated food. My understanding is that irradiation has been approved for practically all foods, including fruits and vegetables.

I strongly suggest that there be prominent labeling, the use of the terms "irradiation" and "irradiated" and also the use of the symbol.

I request a response, please, to update me on the status of this matter.

Thank you.

Sincerely,
Jan Hansen
