3/25/99

Mr. Friedman,

Please act on the petition docket #98P-0151/CP1 to classify meat from downed animals as adulterated. I dont think that this meat should be considered safe and believe that animals for slaughter are probly not as well cared for because of this practice. I dont think we can take the risk of diseased animals being use for human consumption. I hope this concerns you as much as it does me.

Thank-you
Nancy Keeton
