To whom It May Concern:

I want PROMINENT labeling on all food because irradiation is a process that can change a food's taste, texture, nutrients and holding characteristics.

The study conducted for the USDA that found a diet of irradiated chicken fed to mice, died sooner & had a higher incidence of tumors. Chromosomal abnormalities occurred in children from India fed irradiated wheat.

Where is the responsibility?
Where is the understanding.
To continue the debate is criminal and dangerous. STOP.
