Re: Labeling Irriadiated Foods

April 7, 1999

Dear Food + Drug Administration,

5608 '99 APR 13 A10:20

I am for prominently displaying the "treated by irradiation" logo so that consumers can be informed and make their decision. If pro-irradiation companies say that it is healthy and FDA says (proves) it is safe then there is nothing to hide. Again irradiated foods need to be labeled in the consumers immediate viewing, not inconspicuously.

Sincerely,

Sarah Greuel
