April 5th

Dear Dr Henney,

I write to implore you to demand, as Commissioner of the FDA, that all genetically engineered foods are labelled as such. There is too little known about the dangers to inflict these on the unsuspecting public. We have the right to choose whether or not we wish ourselves and our children to ingest these products. 92N-0139 I am English and it is mandatory in my country and all of Europe to label everything genetically engineered. Please

C 5002

follow Europe's enlightened example and take care of the consumer.

Yours sincerely,

Jane Morrow (Mrs)
