4-8-99.

Dear Dr. Sundlof

6080 99 APR 15 A9:11

Please see to it that the Food and Drug Administration (FDA) bans antibiotics utilized to promote growth in farm animals. It's known that when animals live in a health environment, and are fed a nutrious diet, growth promoters are not necessary. Kindly promote better care of farm animals rather than reliance on antibiotics.

Thank you for your time and assistance, Dr. Sundlof! There are greatly appreciated, Dr. Sundlof.

Sincerely,
Mary Millemaci
