Dear Staff

Please:

:1) Keep requiring labeling of irradiated food. Stop wasting our time trying to sneak this past us. Nothing more convincingly appears like hiding worrysome dangers than this

Let the Irradiation promoters be forced to make a public case for their processes value.

0335 99 APR 16 10:44

:2) Test foodstuffs randomly for cadmium, poisonous above a certain Cd:Zn ratio, cadmium has been associated with prostrate cancer as reported in toxicology handbooks. The recent increase in metal ore refining slag for fertilization and in prostrate cancer may be linked, or incineration of Ni-Cd batteries may spread cadmium.

Sincerely

Brian Cady
