I am asking you to ban the forced molting of laying hens. In forced molting, feed is withheld for several days to cause the hens to produce more eggs. Not only is this inhumane, it also increases the occurrence of the Salmonella enteritidis, a food-borne pathogen causing widespread human illness. It is frightening!!!

Also, please ban the use of antibiotics as growth promoters for farm animals. I fear this kind of meat!!!

Thank you

Sincerely,

MD
