Commissioner Jane E. Henney, MD
FDA (HFE-88)
5600 Fisher Lane
Rockville, MD 20857

Dear Commissioner Henney:

I disagree with the FDA's decision to let food's be irradiated, because I think it's bad for the enviornment. The following three reasons are why I am against irradiation

My first reason is that irradiation reduces vitamin levels up to 50% and vitamin C alone up to 10%, says Health and Fitness. Which I think is bad for people who need vitamins.

My second reason is that the bugs being killed can come back and destroy the food. The point, it does not work the way it should be says: Readers digest

98N-1038

C706

My third and last reason is that it raises the cost by 5 cents. People allready pay enough for health insurance says Health and Fitness

In conclusion the above three reasons are why I personaly am against irradiation and this letter should give you an idea what's goin on. Thank you for taking the time to read this letter. I hope you will reconsider irradiation.

Sincerley

K. Schweitzer
