To whom it may Concern - Docket No 98N-1038.

Dear F.D.A.

We are extremely concerned about the issue of irradiated foods and feel strongly such "Foods" must be clearly and prominently labeled with no expiration date on such labeling. Consumers such as our families want to be able to choose for ourselves as to what is safe. We hope you will use the Codex labeling standards and a large Radura symbol on all foods even if such foods are part of a mixed ingredients label.

If the irradiation industry is afraid consumers will be scared off by fair labeling then clearly there is something to be scared of! There must be no change in wording and no small labels - please. Irradiation food labels should be seen as a clear warning to anyone with any sense. Count us as anti the whole business. Thankyou C712
