ROLLAND P. GROTE

April 13, 1999

Dear Dr. Sundlof:

8474 '99 APR 20 AM 10:43

Please move to ban the use of antibiotics used to promote growth in farm animals. As a consumer, I am extremely concerned about how these drugs, and the current factory farming practices, are a real threat to human health. These animals are sick, stressed by overcrowding and confinement and pumped full of antibiotics. I want to see a total change in how food animals are raised in this country and I want the FDA's support in creating positive changes.

Sincerely,

Rolland Grote
