I am writing to Request you to continue requiring all Irradiated Food, Be clearly labeled and marked with a Statement stating it has Been irradiated. I think it is an absolute OUTRAGE not to let us know this has Been done! I want labeling because I personally want to avoid all irradiated Food, and i think it absolutely necessary that this be labeled, as important as listing ingredients.

Irradiation can cause the formation of toxic substances as well as reduce nutritional value and cause chromosal damage. That this process even be allowed to Be Done is unbelievable and to not allow us freedom of choice By hiding it is absolutely HORRIBLE. I strongly am for eradicating the process, and if not at least having proper labeling. Sincerely,

Cynthea Paul
