Docket No. 98N-1038

I am writing to request that all irradiated foods be labeled conspicuously and prominently, including products made with irradiated ingredients. Use of the radura symbol would be immensely helpful to consumers. These labeling requirements need to be permanent, as other types of consumer labeling are. I do not support the industry's use of alternative terms like 'cold pasteurization' or 'electronic pasteurization', believing many consumers would not know what the term refers to.
