Dear Ms. Jane Henney,

I am writing in regards to Docket 99P-0033/CP1. It is very important for all mankind + animals be treated humanely. Feeding dead + sick animals to animals + for people to have to eat this contaminated meat is way beyond any good reasoning. Its no wonder so many people are sick with cancer etc. We the people look up to our government to keep us safe from harmful foods. From what I read + see on TV it is not so. It is time for a change - help save the animals + the people who eat this meat. Please
