Dear Administrator:

Please ban the use of antibiotics as growth promoters for farm animals. Antibiotics used for humans will no longer be effective for us because eating this in our foodstuffs will make us immune to its protection when necessary.

The drug companies will deny such effects. However, the European Union voted to ban 4 growth-promoting antibiotics which are also used to treat human illness.

Our advances in curing illnesses will eventually no longer be helpful because of the practice of animal dosing.

Sincerely

Lillian Perlman
