April 17

Dear Commissioner Heaney:

I can't believe that I cannot know in advance that I am buying food that has been genetically altered. If I made your salary maybe I could afford totally organic food as a way out, I do buy as much of it as I can, but I'd like to know what in my regular food. I want labels! Do something for us once in a while. These companies can label so I can make a choice.
