Dear Commissioner Henney,

The card enclosed speaks for me very clearly. I, for one, do not wish to consume transgenic food unknowingly. I expect the FDA to protect public health by prominently labelling genetically altered foods.

Industry wants to keep us ignorant, free from lawsuits + problems with allergic reactions to altered foods.

Will you kindly inform me whether you intend to live up to your mandate to protect our health. Many of my friends would also like to know.

Thank you!

Sincerely,

Z Andrew Gerry
