4/15/99

I am very concerned about the food I eat. It is my right as a consumer to know if the food I'm eating has been genetically altered.

In may, a lawsuit was filed challenging the FDA's policy not to require labels on transgenic foods. I'm writting in support of the demands of this lawsuit. I am eager to hear that the FDA is living up to its mandate to protect public health and will provide Americans (the way it is done in England) with information we need about the food we eat.
