April 21, 1999

Dear Sir or Madam;

This concerns Docket # 98N-1038.

I am writing to request that prominent, explicit labeling be used on all irradiated food. This should include the terms "irradiated" & "irradiation" and/or the radura radiation symbol. It will only mislead the public to substitute terms. We need to be allowed to make a choice on the treatment of the food we eat. We can only make that choice with clear, informative, honest labeling. Thank you.
