FDA, Re: irradiated food label
genetically engineered food

Please stop your sidestepping on food labeling Now. I want permanent and prominent (1) labeling of irradiated food that say 'IRRADIATED' (2) (3) and also of genetically engineered food. Don't let (4) labeling requirements expire. Be straight with us, the Public so we can be conscious and educated in our food choices. stop helping large corporations hide what they Feed us.

Sincerely
Silvermoon Pamela Johnson
