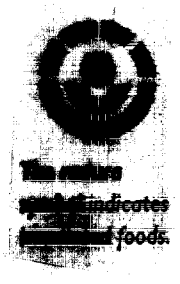
Docket 98N-1038
Re: Irradiated Foods

Dear Sirs

I am asking for conspicuous & prominent Labelling for all irradiated foods. incl. products made from irradiated ingredients (such as pork used in sausage or soup) Also:

1. Adequate signs on bins for irradiated bulk produce.
2. Labelling for irradiated foods should be <u>permanent</u> just like other types of consumer labelling.
3. The Codex labelling requirements require that all irradiated food be labelled as irradiated. The radura symbol should be used to protect customers



I hope this letter will be of some value to you to let you know how much of the public feels.

Sincerely

Ella M. Hassinger

P.S. Do <u>NOT</u> sell my name for any purpose.
