April 29, 99

As a member of the Center for Science in the Public Interest (CSPI), I urge you to save human lives by banning the use of medically useful antibiotics in the feed given to animals. Adding antibiotics to animal feed in order to promote growth can make bacteria resistant to those antibiotics. As a result physicians may have no way to treat life-threatening bacterial infection in their patients. This is why I support the petition filed by CSPI.

Sincerely, C115
