4/28/99

To: FDA Commissioner, Jane E. Henney

I am a member of the Center for Science in the Public Interest and I support their petition to save human lives by banning the use of medically useful anti biotics in animals. Adding anti biotics to feed to promote growth may make bacteria resistant to those anti biotics. That would leave physicians helpless to treat life threatening bacterial infections in humans.

Please help all of us. Respectfully,

Arnold Meltzer
