To Whom It May Concern:

I strongly oppose the Draft Memorandum being proposed by the FDA.

In particular, I object to the definition of "inordinate amount" which restricts the availability and the right to obtain medically necessary compounded medications by limiting the number of prescriptions that can be shipped across state lines from specialized compounding pharmacies.

This proposed legislation clearly is designed to benefit the multi-million-dollar pharmaceutical houses and not the patients. There are large segments of the population which need customized care + medications and which will be deprived of adequate care if this proposal is adopted.

Please, stop this proposal!! The Food + Drug administration should be advocates for the patients and not for the pharmaceutical companies.
