March 1, 99

Dear Dr. Henney,

My name is Nick Christos and I live in Toledo Ohio. I am not a doctor however one doesn't have to be a doctor to be informed about health. I am writing this letter to you today to express some concerns about the ~~health~~ quality of the nations drinking water.

Sodium Flouride is a poison. I don't have to tell you what the Merck Index is. The Merck lists the main use of it as a rat poison and a roach insecticide. It should not be in the water and causes adverse symptoms. Please research this and do something so that our nation doesn't have the Flouride in the water anymore. Chlorine isn't much better either.

Water should be purified with Ozone or some form of oxygen. Thank you for your time and for listening to me.

Nick Christos
