Re: Docket No. 98N-1265

0195 '99 MAY 14 P2:14

I am very concerned that in its present form the MOU as well as the compounding section 503A of the Modernization Act, restricts the rights of physicians, patients and compounding pharmacies.

As a menopausal woman it is very important for me to be able to have my medication compounded for my special needs. I want the right to be able to discuss my situation with my pharmacist and to gather information regarding alternative medicines from my pharmacist. It is wrong to limit the flow of information.

I also want the right to use whatever compounding pharmacy I choose no matter which state it is located in. And I want the pharmacy to be able to mail my medicine to me if I may be traveling out of state.

The MOU as written doesn't meet my needs and doesn't make sense to me. Please reconsider.

Sincerely,
Carolyn Mieling
