Re: Petition filed by CSPI, antibiotics in animal feed

Dear Ms. Henney,

As a concerned person I am against the use of antibiotics in animal feed. Continued use of them can cause bateria to become resistant to some types of antibiotics. Currently there is only one brand of milk that does not use hormones or antibiotics in there feed. It is difficult to find and very expensive, but worth it. Please consider my views when dealing with this subject. Thank you.

Regards
Dan Ludlow
