april 28, 1999

Dear Commissioner Henney,

I am writing to you about irradiated foods. While I understand this is one way to eliminate E. Coli and other harmful bacteria, it does not prevent sloppy handling at the plants and in restaurants.

I believe consumers have the right to know if the food we are purchasing is irradiated or not. I want to make the choice for myself whether to buy it or not.

I want irradiated foods to carry a prominent disclosure, in easy-to-read type, on the front of the package.

Thank you,

Mary Rouzer

Dear Commissioner Henney,

As a member of the Center for Science in the Public interest (CSPI), I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics, and that can leave physicians with no way to treat life-threatening bacteria infections in humans! That's why I support the petition filed by CSPI.

Thank you,

Mary Rogers
