Dear Ms Henney,

I am very much concerned that the feed given to the animals we consume have a catch-22 effect on our lives. I implore you to support the petition filed by CSPI.

Isn't it about time that the lives of human beings are put above the almighty dollar? People should be considered more important than big business. Our tax dollars are appropriated to the Food and Drug Administration to protect the lives of citizens, not corporate interests.

Sincerely,
Albert J. Scarcello
