April 20, 1999

Dear FDA -

I have recently learned about the danger of using downed animals for human food - 22 diseases such as bovine leukemia virus, bovine immunodeficiency virus and "mad cow" disease may afflict downed animals.

Please act on docket number 98P-0151/CP1 and stop the slaughter of downed animals for the human food supply.

I know you are concerned the health of the American public.

Thank you.

Mark J. Kennedy
