I am writing in support of the petition against the slaughter of "downed animals." The use of diseased farm animals for food will be highly detrimental the American population.

As the number of health-conscious people increases, the more careful we will be about what goes into our bodies. The food we eat reflects the moral people we are. Please do not pass this petition up; act on it now, and the American people will definelly benefit from your action.

Thank you for your time.

Sincerely,

Gabrielle M. Untz
