Re: Docket No. 98N-1265

To Whom It May Concern:

In its present form, the MOU, as well as the Compounding Section 503A of the Modernization Act, severely restrict the right of physicians and patients to obtain healthcare products from the provider of their choice, and infringes on the right of compounding pharmacists to serve the public needs.

I for one took hormones prescribed by Doctors for years. Many times I asked "how beneficial are they?" They would only encourage me to stay on them. Finally I had a choice to go on natural hormones instead of ones made from horses urine -- how disgusting & even more so when I learned how they abused them to collect the urine. Just threw Prem Pro & others away one day. Thank heavens I have a

98N-1265

C2175

choice. The side effects I had thru the years are gone. Too bad the humane society doesn't make the procedure public & stop the torture, etc.
Doctors, who don't study nutrition can only rely on drug salesmen or women, who give samples & prescribe them & push them on the unsuspecting.

We should have freedom of choice and go back to the natural way!

Thank you for reading this.

Sincerely
Jean G. Woodruff
