May 7, 1999

Greetings,

I am interested in commenting on "Docket #98N-1038, Irradiation in the production, processing + handling of food"

0507 '99 MAY 14 P3:12

I am very adamant about the need for clear labeling of all food that has been irradiated or that contains ingredients that are irradiated.

I believe that it is essential that the food be labeled "irradiated" or "treated with radiation". It is NOT ACCEPTABLE to label them "cold pasteurization" or "electronic pasteurization". That does not clearly indicate the process the food has gone thru.

Irradiated food should alwayse be labeled so people have a choice.

Thank you for putting this up for public comment, for listening to and taking our opinions into consideration

Sincerely,

D. Ann Joy Legender
