May 10, 1999

To the FDA —

I am writing concerning your plan to remove all current labeling requirements for irradiated food.

1150 1 '99 MAY 14 P3:12

I am very much against this plan because without this labeling there is no way for me to know what foods are irradiated and what foods are not.

I have read many articles that support with facts, that irradiating food is a dangerous health hazard.

As a consumer, I think that it is my right to know what is done to the food that I buy at the grocery store.

Therefore, I support keeping irradiated food
