Re: Docket #98N-1038

May 8, 1999

To Whom It May Concern:

0495 '99 MAY 14 P3:10

Please note that my partner and I are very concerned about the possible removal of the "Radura" symbol on irradiated food.

As growers and consumers of organic food for more than 20 years, it is vital to us — to our health and to our security as consumers — to know precisely what we are buying and eating.

Please do not do away with clear labeling requirements for irradiated food!

Thank you,
