Dear Sir:

5-5-99

I am writing to you to urge you to use conspicuous and prominent labeling for all irradiated foods, including irradiated ingredients. We consumers need adequate signs on bins for irradiated bulk produce. Labeling for irradiated foods should be permanent just like all other consumer labels -- Codex labeling requirements require that all irradiated foods be labeled "irradiated". I am requesting also that the radura symbol be used.

Please hear and respond to my plea for healthy nutritional standards.

In Health,

Lauren Cohen
