5158 '99 MAY 21 P1:33

Commissioner:

I would like to urge you to ban the use of medically useful antibiotics from animal feed, in order to prevent bacteria from becoming resistant to these antibiotics, and thus endanger the lives of people who become infected with such bacteria. With more and more bacteria becoming resistant, leaving no way to treat many illnesses, it is important to limit this trend in every way possible, and banning the use of these antibiotics is certainly going to help.

Sincerely,
Eve Malakhof
