Dear Commissioner Henney:

I recently read an article about adding antibiotics to animal feed to promote growth, which can make bacteria resistant to those antibiotics. As a result, physicians may be left with no way to treat life-threatening bacterial infections in humans.

I support the petition filed by the Center for Science in the Public Interest (CSPI) and urge you to ban the use of medically useful antibiotics in animal feed.

Thank you for your help.

Sincerely,

Amy Nylen
